Gillman, Max 2011. *Advanced modern macroeconomics: analysis and application*. Harlow: Financial Times Press.

Full text not available from this repository.

Abstract

Modern Macroeconomics, by Max Gillman, takes a new and modern approach to macroeconomic theory using microeconomic foundations. Building from the standard neo-classical models, Gillman has developed a new dynamic model which works to explain business cycles and unemployment, why you can have a banking lead recession as well as fiscal and monetary policy. Although strong in mathematical rigour all calculations in this text are fully derived and graphs provide a direct representation making it accessible. This text is suitable for undergraduate students studying Advanced Macroeconomics courses.
