Abstract

I have been working about physical laws for a long time. During this period, I think found some information out about secrets of ancient civilizations. The thing which ignited the curiosity on me was a star which is called Tariq in Koran as the star of piercing darkness. Also there are some information about Nibiru that is believed in the gods in the heaven made it visible. These are interesting; because I was noticed that there can be another size black hole can be visible afterwards. Also I noticed that there are some heavenly information about aliens. I decided to make an investigation about them; but there are so many things, worked about 1-2 weeks and I bored; so I decided to publish my findings as short notes about our ancestors who could not leave legacy. It is not an advanced research. Just overhearing about some

possibilities, if there is any body different than us?
