## BOOK DETAILS

**Published by** Royal Irish Academy

January 1994

Paperback / softback

Number of pages: 96

ISBN: 9781874045182

This review of the geology of a classic area in the west of Ireland includes chapters on Dalradian stratigraphy and structure, syn-deformational magmatism, metamorphism, geochronology, and relationships with younger intrusions and cover rocks. It is accompanied by five colour-printed plates including a geological map of Connemara and geological cross sections and maps of Styne Head and Errismore, and gives accounts of other located exposures.

## About the authors
